All,

We are planning to conduct a technical specialist meeting regarding pending actions for the Gold King Mine response at 3:30 today.

Proposed agenda includes:

Coordination of Data

--Where we are/what holes in data remain?

Exposure analysis--Ag/Human Health/Fish and Wildlife

--When can Ag irrigation return

--When can livestock watering return

--When can drinking water wells (public/private) return

--When can fishing return

--When can hunting return

It is critical to have this meeting, since at 4:30 there is a policy meeting with public officials and they will be asking questions related to the above agenda. It would be good to have a unified response, or at least be able to identify significant differences of opinion.

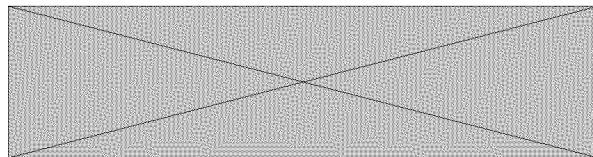

Please let me know if you have questions.

Andrew Ross--please coordinate with CSU--I have the local extension office contact on this email but need campus folks looped in.

Pat
